

# IndoCBM - 3<sup>rd</sup> International Conference

The organizing committee of the 3<sup>rd</sup> IndoCBM Conference and Exhibition Cordially invite industry personnel to attend the 3<sup>rd</sup> Indonesian Coalbed Methane Conference & Exhibition 2010. The theme of this year's conference is "**Indonesia's CBM Development: Time to Deliver**".

Following the success of the first two IndoCBM conferences in 2006 & 2008, significant progress has been made in Indonesia's CBM industry, most notably the revision of the CBM regulation in November 2008, which led to the signing of several new CBM contracts.

With the commencement of CBM exploration and development activities following the new CBM contracts signing, it is believed that it is now time to deliver the results. IndoCBM 2010 provides an excellent platform for global industry players to share new information on operations and strategies, learn about best practices, and explore practical business solutions to the challenges faced by the CBM industry in Indonesia towards bringing CBM to production.

Organizers are hopeful that all participants will not only benefit from the vast opportunities to network with industry leaders, regulators and government officials but also to learn from the world class

experts present at the conference as well as the practical experience from the Indonesia CBM exploration and development activities to date.

## IndoCBM 2008

The IndoCBM 2010 conference will provide the latest updates of the progress in Indonesia's CBM Development, through presentations and discussions on various topics on regulatory framework, reserves estimation, new exploration and exploitation technologies, environmental management and human resources development, potential markets, business and financing models as well as project updates by companies investing in Indonesia's CBM industry.

Designed to meet the growing demand for professional exchange in the CBM sector, IndoCBM 2010 provides excellent opportunities for exhibitors to establish new business relationships and to meet and communicate directly with key executives and technicians from energy companies in the region. The exhibition will showcase the latest technologies in exploration & exploitation, operations, environmental management and commercial utilization.

Don't miss this opportunity to be a part of IndoCBM 2010 !
